

TITAN DRIVE BOX

Manufactured by

Kundel

Superior Design & Engineering

POWER RIGGING POINTS

REINFORCED STANDARD TITAN SIDE WALLS FOR DRIVING

FULL RANGE OF SIZES & MODELS TO MATCH YOUR REQUIREMENTS

RIGID INTERNAL STACKING SYSTEM FOR QUICK ASSEMBLY

ROTATING WEDGE FOR EASY DRIVE AND EXTRACT

EXTENDED CUTTING BAR

RACKING ADAPTERS

OWNER'S MANUAL & TABULATED DATA

ALL STEEL DESIGN

INTERNAL POUNDING MEMBERS

THROUGH WALL SPREADER SOCKETS

ALL STEEL, Solid welded double wall design. High taper reinforced KNIFE EDGE increases pipe area, allowing a tighter Trench. Uninterrupted reinforced vertical steel Members results in NO BEND ENDS. Perfectly positioned lift points make for EASY HANDLING. POUNDING PADS are placed on vertical STEEL BOX tubes and a reinforced top creates an EASY DRIVE.

PROTECTION

A closed trench shoring system that stops ground movement in unstable soil, keeping adjacent structures from sliding into the trench or shifting during progress of the work.

MORE PIPE TIME

The Titan Drive Box moves faster than any shoring system available. Less picks means more pipe time.

VERSATILITY

Not only is the TITAN DRIVE BOX a shoring box system that is leap frogged with multiple bays, but it also can be used as a conventional trench box.
