

LOWPRO® ROAD PLATE CONVERSION GUIDE

COMPOSITE ROAD PLATES CAN BE INSTALLED IN THE FOLLOWING SCENARIOS.

- ▶ Site Safety Risk Assessment must be carried out before installation, only install on compacted surfaces such as concrete or asphalt.
- ▶ In some instances, road plates and trench covers must be bolted for safety, refer to the installation guide for more details.
- ▶ Trench covers can be linked together to safely cover any length of excavation.
- ▶ LowPro 15/05 and LowPro 23/05 are HS20-44 load rated.
- ▶ Trench covers must be installed centrally over the trench.
